

## **Thyroid Nodule Treatment Center Announces Thyroid Nodule CellFX nsPFA treatment by Dr. Harding**

*By introducing state-of-the-art CellFX nsPFA alongside thyroid nodule RFA treatment, Dr. Harding offers the most advanced minimally invasive, non-surgical procedures for treating thyroid nodules, eliminating the need for a lifetime of medication.*

**PHOENIX - Jan. 8, 2025 - [PRLog](#)** -- The Thyroid Nodule Treatment Center is proud to announce the availability of Thyroid Nodule CellFX nsPFA (nano-Second Pulsed Field Ablation) treatment. As a pioneering endocrine surgeon, Dr. Harding is dedicated to offering state-of-the-art treatments to patients suffering from thyroid nodules without requiring surgery. The new CellFX nsPFA technology utilizes ultra-short electric pulses to precisely target and eliminate abnormal thyroid nodule cells, while preserving the surrounding healthy tissue, providing a minimally invasive and highly effective treatment option.

Dr. Harding's decision to include CellFX nsPFA (nano-Second Pulsed Field Ablation) technology in addition to Thyroid Nodule Radiofrequency Ablation (RFA) into his practice reflects his unwavering commitment to providing the most advanced and effective treatment options for patients with thyroid nodules.

"I am thrilled to offer CellFX nsPFA as a new treatment option for our patients," said Dr. Richard Harding. "Nanosecond Pulsed Field Ablation, or nsPFA, has many benefits for patients. It is safe, fast and enables a rapid, natural process for clearing unwanted cellular tissue resulting in a gentle and comfortable treatment experience for my patients."
